

# BSB Belgium

*BSB is a European group specialized in IT-services. Its activities are the publishing of software designed for the financial sector; the conception, development and implementation of tailor-made solutions; the integration of third party software (IDIT or SAP). BSB covers the complete value chain from operational advice until the training of the users.*

BSB is an IT services company and a financial software publisher. Created in Belgium in 1995, BSB is present in Belgium, France (since 2001) and the Grand Duchy of Luxembourg (since 1996). Our core competence is management consultancy and integration of financial information systems applied to the financial industry (a.o. financial institutions, asset management companies and insurance companies) and the public, utilities, services and retail sectors. Carrying out large-scale IT projects for major companies, BSB designs, develops and implements state of the art systems solutions with high added value.

Description of the services and the products :

- + IT Services :
  - Consultancy (functional mastery of the customers' business, business processes reengineering, evaluation of IT systems and design of IT architectures)
  - Development and implementation of customized IT solutions (experience in a wide range of technologies including the new-generation development standards)
  - Implementation of SAP enterprise solutions (SAP Netweaver, mySAP ERP, mySAP Business Suite, SAP for Utilities, SAP for Retail, SAP for Public Sector, SAP for Banking, SAP for Insurance). BSB is a 'SAP Services Partner'.
  - Implementation of IDIT software package published by the company IDIT. This software package is dedicated to non life insurance companies. It allows the complete management of the entire life cycle of the non life insurance products. BSB is an 'IDIT Partner'. This partnership covers tasks such as analysis, integration of the software, its interfacing with the other components of the IT system and additional developments when needed.
  
- + Publishing of financial Software Packages
  - SOLIAM: Asset Management Solution for both private and institutional management (front-to-back and back-to-front). This package covers all the aspects related to accounting and investments management.
  - BSB-Bank Suite (BSB-BS) is a core banking system which manages all operations from the back-office to the front-office. BSB-BS covers all the needs of Private Bankers. It offers all the functionalities needed to commercialize and handle different products, services and financial instruments;
  - BSB-Insurance Suite (BSB-IS) is a comprehensive suite of modules dedicated to the front-to-back management of insurance companies (life, hospitalization and non-life). It offers all the functionalities needed to commercialize insurance products and handle claims in life (classical individual life and group), unit linked life insurances, non-life insurance contracts and hospitalization offerings.
